

Flight Safety Academy

FlightSafety Academy

The Professional Approach to Flight Training...

FlightSafety Academy provides flight training geared to the person with the desire to reach the highest standards of excellence. It is for those who are willing to meet the same rigorous standards followed by future airline captains sent to the FlightSafety Academy by airlines for ab initio (from the beginning) training.

FlightSafety Academy is a Logical Choice...

The FlightSafety professional approach to flight training means that each pilot...

whether flying as a full time occupation... in pursuit of business... or for personal transportation receives training which leads to proficiency, confidence, safety and the professional conduct of every flight. FlightSafety Academy is the logical choice for the airline operations manager seeking a source of training for future pilots. It's the logical choice for the professional pilot to increase proficiency and add ratings. It's the logical choice for the serious minded owner/ pilot to get more out of an airplane. And it's the logical choice for the highly-motivated individual future professional pilot.

Professionalism in flying means more than being paid to fly. Professionalism is an individual's approach to flying.

Professional flying is a blend of knowledge, ability, skill, proficiency and judgment. Flight-Safety Academy is dedicated to these principles, and this dedication is reflected in the quality of the equipment, facilities and the staff.

Instructors are highly experienced educators. Most hold Airline Transport Pilot certificates. Ground and flight training are integrated for maximum learning effectiveness.

The facilities and staff are dedicated to meeting the individual needs of each pilot at the Academy. From Private to Air Transport Pilot ... each program is designed to provide the highest standards of training and proficiency.

Programs . . .

FlightSafety Academy conducts a full range of instructional programs for pilots of fixed and rotary-wing aircraft. Private, Commercial and Airline Transport Pilot courses are offered. FlightSafety Academy is a Hughes Helicopter Service and Pilot Training Center.

Pilots can obtain Instrument and Flight Instructor ratings for both airplanes and helicopters. Fixed-wing multi-engine ratings are offered. Aerobatic training is also available. FlightSafety believes every pilot's experience should include some aerobatic training.

Beginning Student Pilots or experienced Commercial Pilots will both find courses to meet their individual needs. FlightSafety Academy programs fall into four general categories.

Airline Contract Training...

FlightSafety Academy specializes in ab initio training for airlines. Presently, airlines from around the world send their future airline captains to Vero Beach to start their pilot training.

Career Training ...

The Academy offers structured programs for individuals preparing for a career as a pilot.

Many other careers, although not full time flying positions, may be enhanced by pilot credentials.

FlightSafety Academy is an eligible educational institution under the Federally-Insured Student Loan Program (FISL). The student who is a qualified U.S. resident and training for a certificate above the Private Pilot level may qualify for an educational loan based on financial need. Loan amounts and availability are governed by Federal and State legislation.

Professional Upgrading...

Many professional pilots come to Vero Beach to acquire additional ratings, upgrade their pilot certificates or improve their skills.

Individual Pilot Upgrading...

FlightSafety has developed several special programs for serious minded owner/pilots who want to upgrade proficiency and improve the utility of their aircraft. For these persons, finding the time for training is a major factor. By coming to Vero Beach away from business distractions, where full attention can be focused on training, learning is more effective.

Facilities . . .

The professionalism at the FlightSafety Academy is reflected in the quality of the facilities. FlightSafety is dedicated to providing the best possible learning environment.

Classrooms are comfortable and fully equipped with modern visual aids. Instructors have specially equipped podiums providing fingertip control of projectors and classroom lighting. Each classroom seating position is equipped with a responder system to allow the instructor to monitor each student's response to verbal or projected questions in order to evaluate learning effectiveness.

Hangar and maintenance areas are completely equipped. Lounges and study areas can make class breaks or intervals between flights pleasant and productive.

An FAA Control Tower and Flight Service Station are located on the field.

Facilities are complemented by the ideal flying weather.

Students at FlightSafety Academy can stay in dormitory residences located on the airport or at local motels and apartments. The spacious dormitory rooms are air conditioned and well equipped to provide a comfortable living, relaxation and study environment. A swimming pool is located in the residential dormitory complex.

Beyond the training experience, FlightSafety Academy at Vero Beach, Florida offers the benefits of numerous recreational opportunities and an international atmosphere with students from around the world in attendance. "Aviation is spoken here," might well be the motto of the local area as well as the Academy. Piper Aircraft Corporation has a factory and Research and Development Facility at the airport where new production and research aircraft are tested. □ Excellent beaches and numerous areas of interest are a feature of the Florida Coast. And within walking distance are two golf courses. Dodgertown, where the Los Angeles Dodgers baseball team conducts spring training is also the home of the Vero Beach Dodgers Minor League baseball team. During the summer, the New Orleans Saints football team also trains at Dodgertown. Other nearby attractions, famous worldwide, include the Kennedy Space Center, Disney World, Sea World, Cypress Gardens, Silver Springs and Busch Gardens.

Admission Information . . . You may obtain an Application for Admission by writing to FlightSafety Academy. The information on the application will constitute the basis for determining your qualifications for admission. All applicants must meet the Federal Aviation Administration general eligibility requirements for pilots' certificates. Before you begin training you must obtain an FAA medical certificate, which must be valid throughout your training. We recommend that those applicants contemplating a professional flying career obtain a First Class medical certificate. Applicants desiring only a Private Pilot certificate need only hold a valid Third Class medical certificate. There is almost certainly an authorized FAA Flight Surgeon near you. Names and addresses can be obtained from the nearest FAA facility or FlightSafety Academy.

If you have questions which have not been answered so far, our staff is at your disposal. Merely call or write us for further information.

FlightSafety Academy®
is a subsidiary of FlightSafety International®, a recognized leader in aviation training. FlightSafety International was founded more than thirty years ago on the philosophy,

"the best safety device in any aircraft is a well-trained pilot."

Today in addition to the FlightSafety Academy, FlightSafety International operates 23 learning centers in North America and Europe. FlightSafety International has been designated the factory authorized training organization for almost all manufacturers of turbine powered business aircraft — Airbus Industrie, Bell Helicopter Textron, British Aerospace, Canadair, Cessna, Dassault, Gates Learjet, Gulfstream American, Lockheed, Mitsubishi, McDonnell Douglas, Piper, Rockwell, Swearingen, Westwind, and trains pilots and maintenance technicians from the military, NASA, the FAA, airlines and more than 1600 corporations. Among the more than 8,000 pilots attending FlightSafety training are the pilots who fly the President of the United States of America.
